23.10.24 The Hive - Environment Council & Wellbeing Council	In today's school council meeting, we discussed the Buddy Bus Stop and we found different signs, benches and bus stops to invest in for the playground. The school councils discussed the pros and cons for each of the examples put forward and then we voted for the one we thought would be best suited to our playground.  The image block contains three photographs. The top left shows a young girl in a school uniform standing next to a tall, grey, freestanding sign that says 'Buddy Stop' and features an illustration of four children. The top right shows a similar 'Buddy Stop' sign, but it is mounted on a black bench. The bottom center shows two girls sitting on a wooden bench outdoors; the bench has a large, smiling face carved into its backrest.	Share the bus stop the school council chose with Mr South. Ask Mr South to invest in a bike rack for the playground.

The children voted for the following design as they thought that it would be weather-proof and it would be visible across the playground. The children decided that we should place it near a bench as we already have lots of benches on the playground. *In the future, we can paint a bench to make it into a buddy bench.*

In addition to this, we also discussed the fact that scooters are not cared for on the playground. The children discussed that we should have scooter racks to park the scooters in to keep them safe.
