

School Council Meeting

Agenda	Minutes	Action Points
9.10.24 The Hive - Environment Council	We began by introducing ourselves and explaining why we wanted to be part of the Environment Council. Then, we discussed our ideas and what we'd like to achieve for the year. These were the things that we mentioned: • Recycling bins in classrooms. • Make sure people are using litter pickers correctly. • Buy new resources for the outside areas during break and lunch. Could we buy tools? • Let's change the display board in the hall. We could make this display seasonal (like the infant school) or create a shared board. • Could we create more sheltered areas outside for when it rains? This means we can still go outside. • More varied sports at break time/lunch time. • Make sure the children know the rules for the outdoor zones - reminders in assembly. • Friend station/buddy station outside for children that are feeling lonely. • Let's grow our own vegetables or do gardening.	Discuss recycling with Mr South and recycling bins in each class. Explore display ideas to update the display in the hall. Discuss outdoor zones with Mr South and different resources - potentially ask parents at home. Speak to Gabby about the buddy station.
