

School Council Meeting

Agenda	Minutes	Action Points
7/11/22 Create air pollution posters	The school council were reminded about the air pollution issues around our local area. We discussed key vocabulary e.g. idling, engine, pollution, air quality and transport before sharing some posters. We are creating posters and then Mr South will be enlarging these as banners for our school site. The children then began planning and designing their air quality posters in the session.	- We need to organise an additional school council meeting for next week to finish posters. - Once these are finished, they need to be shared with Mr South as he will be enlarging them as banners for the school site.
